## Survival of the Fastest

IntelliScan XDS

High speed scanning has evolved. The IntelliScan family of production document scanners offers the highest speeds for the most challenging scanning applications. But it's not just about speed. In order to survive in today's world you need solutions that scan continuously, even with the most difficult intermixed documents.

The IntelliScan has been designed to provide significant cost savings by reducing document preparation and labour intensive scanning tasks. You also benefit from exceptional quality images, superior document handling and a further reduction in operating costs with an extensive range of automated data capture and document sorting options. For the fastest speeds and the greatest savings, the IntelliScan provides the perfect animal for the harshest scanning environments.

- Ultra high scanning speeds – from 80 to 550 documents per minute (based on A4).
- Continuous scanning – sophisticated feeding, paper handling and error recovery tools.
- Superior quality images first time – up to 1,000 dpi true optical resolution, Image Quality Assurance and Auto Colour Detection features.
- Extremely low consumable costs – over a three year period these savings really add up.
- BancTec's on-site maintenance and 24/7 support - there's no third party to rely on.

IntelliScan SDS

To find out how you can speed up your capture tasks, reduce your operating costs and improve the quality of your information, contact BancTec on: **+44 (0)1753 778888** or visit: **www.banctec.co.uk**

INTELLISCAN® XDS

IntelliScan is a next-generation document processing suite that redefines speed and produces superior, higher resolution images.

IntelliScan offers unparalleled performance for a wide variety of business applications with its intelligent design, advanced technology, ease of operation, flexible configuration options and multiple speed/higher-resolution scanning capabilities. IntelliScan XDS (eXtreme Document Scanner) combines with IntelliScan USC (Universal Scanner Control) software to complete the solution suite.

Image caption

INTELLISCAN® XDS

FEATURES AT A GLANCE

- Unparalleled combination of image quality, optical resolution and throughput
- Quick and easy access to every document at all times
- Multi-technology double-feed detection ensures that every document is captured
- Unrivaled accuracy with real-time MICR Triple Read recognition
- Multiple document sorting capabilities including different size pocket configurations
- Video based training for quick, yet effective operator orientation
- Touch screen monitor and other one-touch controls maximizes operator efficiency
- Scan-time IQA monitoring

IntelliScan XDS offers countless ways to help clients handle, process, sort and scan all types of documents in a variety of sizes. Built for multi-application, high-speed and image quality, the IntelliScan XDS goes a step beyond other document processing systems, offering a variety of valuable features.

Configuration options are available that capture and output color images ranging from 65 pages per minute (ppm) at a true 600 dpi optical resolution up to a speedy 550 ppm at 200 dpi.

With a completely open track, the IntelliScan offers the least restrictive paper path in its class, simplifying document retrieval in the rare event of a paper jam. The IntelliScan XDS also features the error recovery module which increases document throughput by allowing quicker recovery from problems, minimizes the number of documents to be re-fed and reduces the chances of missing or out-of-sequence documents.

Highest in Image Quality

Enhanced optics and illumination capabilities provide superior image quality for difficult documents and photographs. The IntelliScan XDS also offers real-time JPEG 2000 image output which enables the retention of more image detail with a smaller file size. Other output formats are available including JPEG, TIFF, PDF/A-1b and uncompressed (BMP) grayscale.

Image Quality Assurance Monitoring

IntelliScan XDS transports includes the ability to perform in-line Image Quality Assurance (IQA) testing for various document and image flaws including: folded or torn corners, irregular or flawed edges, too dark or too light images, excessively skewed documents, or oversized or oversized documents. By automatically analyzing images against a list of user-defined quality criteria, you are able to detect and repair defects and resolve issues early in the scanning process.

Client quote

OVERVIEW

Public Works and Government Services Canada (PWGSC) is one of Canada's oldest federal departments, dating back to 1941 when it was known as the Board of Works. PWGSC was formed in 1993 when four departments – Public Works Canada, the Translation Bureau, Supply and Services Canada, and the Government Telecommunications Agency – were combined. Today, PWGSC is one of the largest federal departments, and provides common services to more than 100 federal departments and agencies.

A key service PWGSC had provided over the years was the processing of paper payments. However, with the introduction of direct deposit and electronic payments, the agency's check reconciliation business started to decline.
