

designinc

Web Portfolio

For the big, the small and everything in between, Design Inc build effective websites for businesses who want to get the most from their online marketing.

Design Inc is an award-winning UK-based digital creative agency providing our clients with modern, forward thinking websites and eCommerce solutions.

We blend strategy, creativity & technology combining to improve the way a website works for our clients' audience.

We have been building websites for 20 years. That is a long time for this media and, during that time, websites have changed dramatically. Not just in the build and functionality, but also in the way that the end user interacts with the website. By understanding how different browsers, viewing devices, competition, search engines, content management, security, etc can all affect the user experience, we can keep one step ahead of the competition. The result: - outstanding websites that work hard to attract relevant enquiries.

Whether you are looking for a good looking, hard working website to promote your services, sell your products or simply attract truly relevant enquiries, we can help. The following pages will provide an insight into some of our more recent work.

Forecasting

FlexiCast - Evidence-Based Pharma Forecast Toolkit

Evidence-based forecasting is an approach to forecasting, championed by Inpharmation, that involves building forecasts that are based on:

- Facts rather than opinions.
- Validated techniques not untested approaches or guesses.
- Simple, transparent techniques rather than unintelligible black boxes.

Our "manifesto" for evidence-based forecasting is contained in the book *Sales Forecasting for Pharmaceuticals: An Evidence-Based Approach* by Inpharmation's Managing Director, Gary Johnson.

A number of the world's leading pharma companies batch order this book to help instill an evidence-based approach to forecasting in their organizations.

"Europe's most respected pharma forecasting specialist consultancy."

Centre For Executive Leadership

What can evidence-based insights do for you?

For decades, Inpharmation has been driven to find the optimum sales forecasting models that are relevant for pharmaceutical sales forecasting. If you've ever questioned the validity of the sales forecasting approaches recommended to you by a consultancy then you'll understand why we developed a toolkit of validated forecast models for the pharmaceutical industry, delivering pricing solutions based upon models and methodologies that have been extensively validated for use in the pharmaceutical industry to gain market access.

[see more](#)

The evidence behind Inpharmation's fact based approach to pricing is meticulously documented in the book *Sales Forecasting for Pharmaceuticals: An Evidence-Based Approach* by Inpharmation's Managing Director, Gary Johnson.
